## Integrated Temperature Sensors Options

1. Thermistor for Continuous Indication

- Excellent Repeatability

Value: 10,000 ohms @ $77^{\circ} \mathrm{F}\left(25^{\circ} \mathrm{C}\right)$
Tolerance: $\pm 0.2^{\circ} \mathrm{C}$ from $32^{\circ} \mathrm{F}$ to $158^{\circ} \mathrm{F}\left(0^{\circ} \mathrm{C}\right.$ to $\left.70^{\circ} \mathrm{C}\right)$
Operating Temperature: $302^{\circ} \mathrm{F}\left(150^{\circ} \mathrm{C}\right)$, Max.
Alpha @ $25^{\circ} \mathrm{C}$ : $-4.39 \% /{ }^{\circ} \mathrm{C}$
Dissipation Constant: $1 \mathrm{~mW} /{ }^{\circ} \mathrm{C}$ in Still Air

$$
8 \mathrm{~mW} /{ }^{\circ} \mathrm{C} \text { in Oil Bath }
$$

2. Thermostat for Switch Action

- Settings from $150^{\circ} \mathrm{F}$ to $175^{\circ} \mathrm{F}$
- Open or close switch on increasing temperature

Return Policy
Returns are accepted on stock items up to 30 days from date of order. You must contact our Returns Department for a Return Authorization (RA) number. Return the goods - freight prepaid - in the original container and include original packing slip. C. O. D. returns are not accepted. Gems reserves the right to apply restocking charges.
Tel: $860-793-4357$
Fax: $860-793-4563$

Installation Multi-station level switches install vertically in tank top (mounting up) or in tank bottom (mounting down). Level switches will operate normally inclined up to $30^{\circ}$.

| Mounting Types <br> *Note: Units greater than 72" overall length are supplied with collars with setscrews (made of same material as stem and mounting), in place of float-stop rings. Collars are optional on units less than $72^{\prime \prime}$ overall length Units requiring 316 SS float stops must be special-ordered with 316 SS collars instead of grip rings. | Type 1 1/2" NPT | $\begin{gathered} \text { Type 2 } \\ 1-1 / 4^{\prime \prime} \text { NPT } \end{gathered}$ | $\begin{aligned} & \hline \text { Type 3 } \\ & \text { 2" NPT } \\ & \hline \end{aligned}$ | $\begin{gathered} \hline \text { Type } 4 \\ \text { 3" Dia., 150\# Flange } \\ \hline \end{gathered}$ |

LS-800 Adjustable Mounting
Adjustable mounting is available for LS-800 Series Mounting Types 2, 3, LS-800 Ses Mounting Types 2, 3, and 4. A special cinch nut on the mounting allows the stem to trave up or down for fine tuning of the actuation points. The extent of adjustment depends on the unit length and the distance from the mounting to the highest float stop.

## Note

Maximum overall length is limited Stop to 72 " with this option.

## Installation Procedure for Model LS-802 - Two-Piece Level Switch

1. Unpack unit from shipping crate.
2. Position unit near tank and unstrap stem assemblies.
3. The lower stem section (section with floats) can be inserted into tank to facilitate ease of installation, but must be retained to install upper section.
4. With lower stem in desired position, insert tube coupling from upper stem section into lower section. Tighten
coupling nut securely to stem ( $\sim 1$ turn past handtight).
Check and tighten the upper section nut, if necessary.
Cable exiting from the upper section conduit connector can
be lightly pulled taught through grommet to prevent excess cable slack in upper stem.
5. Install unit in tank and tighten mounting plug.
6. Connect level switch wires per wiring diagram

## Notes:

Multi-station units included in shaded areas of chart can be supplied in UL-recognized configurations
2. Wire size is \#18 AWG for units of UL-recognized configurations and \#22 AWG (Teflon) for
3. Units with recognized configurations. 50 or 100 VA switches are not UL-recognized.

## Switch (N.O. or N.C.):

SPST: 20 VA or 100 VA

$$
\text { SPDT: } 20 \text { VA }
$$

Lead Wires: \#22 AWG, 24" L., Polymeric

## Typical Wiring Diagrams

For clarity, only two actuation levels are shown in each group diagram.

| Group I SPST | $\begin{aligned} & \text { Group II } \\ & \text { SPST } \end{aligned}$ |
| :---: | :---: |
|  | $\left\lvert\, \begin{array}{ll} L_{a} \\ L_{-} & \\ \hline \end{array}\right.$ |
| Group III SPDT | Group IV SPDT |

Actuation Level Dimensions

*Actuation level distances and $L_{0}$ (overall unit length) are measured from inner surfaces of mounting plug or flange.
Length Overall $L_{0}=L_{1}+$ Dimension B. See mounting types for maximum length values.

Switch Ratings - Maximum Resistive Load

| VA | Volts | Amps AC | Amps DC |
| :---: | :---: | :---: | :---: |
| 10 <br> General Use | $0-50$ | .2 | .13 |
|  | 120 | .08 | N.A. |
|  | 100 | N.A. | .1 |
| 20 <br> Pilot Duty | $1-30$ | .4 | .3 |
|  | 120 | .17 | .13 |
|  | 240 | .08 | .06 |
| 50 <br> General Use | $0-50$ | 0.5 | 0.5 |
|  | 120 | .4 | .4 |
|  | 240 | .2 | .2 |
| $100^{*}$ | 120 | $.8^{* *}$ | N.A. |
|  | 240 | .4 | N.A. |

Level switch units with 50 VA and 100 VA swtiches are not UL recognized or CSA approved.

* Limited to 50,000 operations

Switch actuation levels are determined following the guidelines below:
All units $72^{\prime \prime}$ or less length overall with stainless steel or Buna $N$ floats. Also Type 5 units over 72 " length overall with Buna N floats:

A = 1-1/2" minimum distance to highest level (2", Type 5 only $B=2 "$ minimum distance from end of unit to lowest level C $=3$ " minimum distance between levels
$D=1 / 4^{\prime \prime}$ minimum distance between actuation levels (Note: One float for two levels can be used only when low level is N.C. dry and high level is N.O. dry.)

Types 1, 3, 4 and 5 units with stainless steel float P/N 15666
$A=1-5 / 8^{\prime \prime}$ minimum distance to highest level ( 2 ", Type 5 only)
$B=2-1 / 2^{\prime \prime}$ minimum distance from end of unit to lowest level
$B=2-1 / 2^{\prime \prime}$ minimum distance from end of
$C=4 "$ minimum distance between levels
$D=1 / 4^{\prime \prime}$ minimum distance between actuation levels (Note: One floa for two levels can be used only when low level is N.C. dry and high level is N.O. dry.)

## Notes:

1. $A, B$, and $C$ dimensions are based on liquid specific gravity of 1.0 .
2. One float for two levels can be used only when 20VA switch is used.
3. Actuation levels are calibrated on descending fluid level, with Actuation levels are calibrated on descending fluid level, with unless otherwise specified
4. Tolerance on actuation levels is $\pm 1 / 8$
