## Conduit Connections for Opto-Pak (P/N 149535 \& 177714)

When making conduit connections, be sure to remove P.C. board assembly (four \#6 screws) from box before knockouts are removed. Two sizes of conduit can be used: 7/8" and 1-1/8" diameter. Conduit connection must be watertight (i.e., gasket used) to maintain NEMA-4X rating

Two of the six conduit knockouts are shown in Figure 3 (below).

## - WARNING

Product must be maintained and installed in strict accordance with the Gems Technical brochure and instruction bulletin. Failure to observe this warning could result in serious injuries or damages.

## Wiring Controllers .. .

Make connections to spade terminals using $1 / 4$ " female spade receptacles provided.

The open board controller (P/N 149536 \& $P / N$ 162171) with dimensions and connection information is shown in Figure 1.

A typical normally open (N.O.) output wiring diagram with AC-powered alarm is shown in Figure 2.
