

New, wide Makrolon Indication Rail #34837

This new version of Makrolon indication rail is identical in dimension to the aluminum indication rail and is equipped with the red / silver aluminum flags.

This new version Makrolon rail will be installed on all indicators which are shipped as of 1st October from our factory.

For the same price we offer you:

- Twice the indication width
- Enclosure IP54
- New mounting clips which do not obstruct visibility
- and best of all 5000 mm continuous indication

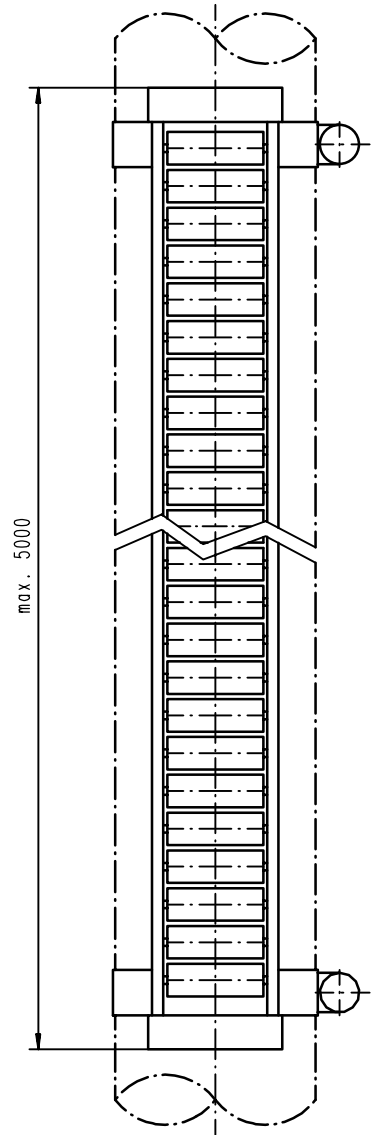

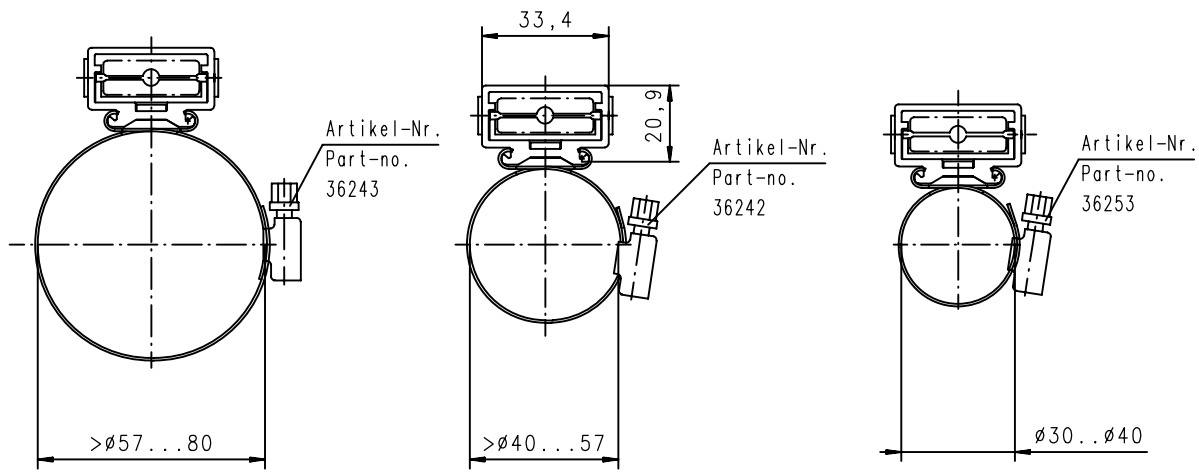

Together with this new Makrolon indication rail we have also modified the mounting clips for the range of 3 indication rails and switches series 33.

Unlike the present clips the new ones have now crossed ends as per the enclosed sample. The advantage of this design change is in the much flatter angle under which the clip forces are acting on the switch- or indication rail recesses thus resulting in a more secure fixing of the accessories to the indicator tube.

For your further reference please find below a new, revised summary of the switch-, transmitter- and indication rail clips, grouped by application and tube diameter.

Product	Tube	Part Number
<u>Makrolon Rail 34837</u>	30/33.7 mm	36253
	53 57 mm	36242
	60 80 mm	36243
<u>Makrolon Rail 34837 with Protection Tube</u>	30/33.7 mm	80648
	53 57 mm	84043
	60 80 mm	84044
<u>Aluminum Indication Rail 34560 / 34570</u>	30/33.7 mm	36253
	53 57 mm	36242
	60 80 mm	36243
<u>Measuring Scale with all wide rails</u>	30/33.7 mm	35337
	53 57 mm	35118
	60 80 mm	36463
<u>Switches Series 33... (Plastic Housing)</u>	30/33.7 mm	36253
	53 57 mm	36242
	60 80 mm	36243
<u>Switches Series 31... (SS-Steel Housing) and all Transmitters</u>	30/33.7 mm	80648
	53 57 mm	82069
	60 80 mm	82071

Einsatzbereich / Range of application:			
Betriebstemp. Operating temp.	Ausführung Execution	Flügel (Alu) flaps	Artikel-Nr. Part-no.
max. 150°C	Makrolon	rot(red) / weiss(white)	34837
Anzeigeschienenlänge / Length of indication rail: max. 5000mm			
Schutzart / Enclosure: IP 54
