CONTROL COMPONENTS PTY LTD:

Hazard Management Policy (2026)

In the context of this policy, a hazard constitutes anything with the potential to cause harm to life, health, property, or disruption to operations.

The primary purpose of the ***Control Components Pty Ltd*** (CCPL) ***Occupational Health and Safety*** (OH&S) system is to prevent accidents and incidents from occurring by having planned processes for identifying potential risks, their causes and taking corrective action on these causes before an incident occurs.

Our CCPL hazard management process aims to:

- ***Identify:*** the hazards to safety, health, property, the environment and operations that could exist
- ***Assess:*** evaluate the risk levels associated with the hazards and prioritise them for control
- ***Manage:*** develop and implement actions for dealing with the risks
- ***Report hazards***

Along with a copy hung from our chemical storage cage, we maintain in our general admin office a register of all hazardous, toxic or flammable liquids in use in our office and factory.
