Indicating window on the V series

On the V series there is an alternative to have a small indicating window on the control unit which makes it possible for you to see an indication of the actual flow.

The scale in the window is represented by the chosen measuring range of the flow monitor. For example: If you have chosen the range of 6 – 12 litres per minute the + represents 12 l/min and the – represents 6 l/min. The small pointer will give you information of the actual flow, if it is on the lower part or the upper etc.

This option comes with an extra cost and to order please specify: with indicating window on your purchase.
Eletta products monitor everything from simple cooling circuits in induction heating machinery to the gas flow of carbon dioxide in manufacturing processes. The company’s proven orifice plate technology is highly effective and well recognized.

**Applications**
- Monitoring flows in cooling circuits
- Monitoring flows in lubricating circuits
- Antifreeze protection of heat pump systems
- Dry out protection
- Starting and stopping of pump motors
- Gas applications as well as liquids
- Transformers
- Turbines
- Industrial furnaces
- Industrial robots
- Welding machines
- Pulp refiners
- Mining equipment
- Emergency showers
- Measuring nitrogen

**Industries**
- OEM-customers
- Machine builders
- Research institutions
- Particle accelerators & cyclotrons
- Power plants, hydrogen, nuclear and thermal
- Paper mills
- Steel mills
- Mining
- Automotive

**Features**
- Robust, simple and durable
- Not affected by static pressure
- Insensitive to magnetic fields
- No moving parts
- Interchangeable control units to fit all pipe sections
- Quick response times
- Position independent and compact
- Simple primary element – low spare parts cost
- For gases and liquids
- Connections DN15 - DN400
- 10 - 100 bar
- Steam applications
- 4 - 20 mA
- Digital Display
- 130 mm Dial
